PROFESSIONAL SUMMARY

MERN Stack Developer with 3+ years of hands-on experience building full-stack web applications and RESTful APIs. Specializes in real-time features, role-based access control, file uploads, and scalable database design. Currently working as a backend developer for orgaGym, delivering production-ready features. Strong problem-solver who writes clean, maintainable code and collaborates effectively in remote teams.

TECHNICAL SKILLS

Backend: Node.js, Express.js, Socket.io, REST API design, JWT, Cookies, Multer

Databases: MongoDB, Mongoose, PostgreSQL (basic), MySQL

Frontend: React, Redux Toolkit, Tailwind CSS, React Router, Axios

DevOps & Cloud: Vercel, Render, AWS (basic), Cloudinary, Git, GitHub

AI Integration: OpenAI API (prompt engineering, streaming responses)

Other: Project Management, Agile basics, SEO fundamentals

WORK EXPERIENCE

BACKEND DEVELOPER (PROJECT-BASED) | ORGA-GYM

Remote | 2025 - Present

- Developing and maintaining backend services for a gym management platform, including user authentication, membership tracking, and payment integration (in progress)
- Designed MongoDB schemas for member check-ins, class bookings, and trainer assignments
- Built RESTful APIs for frontend consumption, ensuring <200ms average response time
- Collaborated with frontend developers to integrate real-time workout progress tracking (WebSockets planned)

Part-Time Remote Backend Developer | Self-Employed / Freelance

Remote | 2023 - Present

- Developed and deployed RESTful APIs using Node.js, Express, and MongoDB for 5+ client projects
- Implemented authentication (JWT, cookies), role-based access, and file upload (Multer + Cloudinary)
- Optimized database queries (indexing, aggregation pipelines) to reduce load times by 30%
- Managed deployment on Vercel and Render with environment variable security

Full Stack Developer Intern (Remote)

Remote | Sep 2024 – Oct 2024

- Contributed to full-stack features for client web apps using React, Node.js, Express, and MongoDB
- Built reusable frontend components and integrated backend APIs
- Assisted in debugging production issues and writing unit tests (Jest basics)

PROJECTS

Wuddy – Social + Professional Networking Platform

MERN, Socket.io, Redux Toolkit, Tailwind CSS | github.com/mrumairkhan74/Wuddy

- Built a hybrid networking web app combining social feeds and team collaboration tools
- Implemented real-time one-to-one and group messaging using Socket.io with read receipts
- Added birthday notifications, like system, and secure JWT authentication
- Designed responsive UI with Tailwind CSS and state management via Redux Toolkit

TrackMantis – Bug & Issue Tracking System

MERN, Socket.io, Cloudinary, Tailwind CSS | github.com/mrumairkhan74/TrackMantis

- Full-featured bug tracker with role-based access (Admin, Developer, Tester)
- Enabled bug reporting with priority, severity, OS/browser details, and screenshot uploads (Cloudinary)
- Integrated real-time comment system using Socket.io for team collaboration
- Built interactive dashboard with charts for bug status, priority, and severity trends

Real-Time Chat App | WE-CHAT

MERN, Socket.io, Tailwind CSS | github.com/mrumairkhan74/WeChat

- Built a feature-rich chat app with image sharing, emoji picker, message seen status, and persistent conversations
- Integrated Socket.io for low-latency messaging and MongoDB for chat history

GearIX – Car Marketplace Web App

MERN, Multer, Cloudinary, Tailwind CSS | github.com/mrumairkhan74/GearIX

- Developed a full-stack e-commerce platform for car listings, browsing, cart management, and order placement
- Implemented user authentication (register/login), car filtering by category, and image upload via Cloudinary
- Built RESTful APIs for cart operations and order processing with MongoDB transactions

EDUCATION

Bachelor of Science in Software Engineering

Virtual University of Pakistan | Apr 2020 – Sep 2025

- Coursework: Data Structures, Databases, Software Architecture, Web Development
- Capstone: Full-stack project using MERN stack for real-world problem solving

CERTIFICATIONS & ADDITIONAL INFORMATION

Certifications: MERN Full Stack Web Developer (Mindluster), Project Management Professional (PMP – in progress), Full Stack Developer (Developer Hub Corporation), CISCO Network Engineer

Languages: English (Professional), Urdu (Native)

Deployment Platforms: Vercel, Render, OceanDigital, AWS (EC2 basics)

AI Tools: OpenAI API (GPT-3.5/4 integration, prompt engineering)
